Quality Through Experience

Loddon Primary School
Working together to realise the potential in everyone.

Hi my name is Neil and I am the Site Manager who is looking after the building works at your school. Here is a picture of me so you know who I am.

Each month I will write to you and tell you a little bit about what we are doing and how we are doing it. I hope you like it.

This month we have started to build the outside games pitch. You will see Nigel and Paul driving the big machines. Nigel drives the big digger and he will be digging out lots of mud so we can build a road to where we are working. Paul drives the dumper truck that takes all the mud to where he builds a big pile. Soon you will see Nigel digging into that pile and tipping it into lorries that take it all away.

We will also get other lorries delivering stone that they will tip onto the ground for our road and your new games pitch.

When we have finished digging the road we will be building some walls around the new pitch. We will get some big concrete mixers delivering to your school.
